Endoscopio – Heavy Duty Rigid GenScopes

Heavy Duty Rigid GenScope Borescopes are constructed with stainless steel probes and utilize an acromat lens system, which provides a bright and clear image. Rigid borescopes are useful for industrial applications where a straight entry is available, as found in engine blocks, aircraft engines, and rifle barrels.

These scopes are very durable, and can withstand a more abrasive environment. Additionally, they are less expensive than some other scopes, thus proving to be extremely useful in practical, every day applications. Diameters range from 4.2mm to 10mm to fit your requirement.

Many customers say this particular GenScope is the workhorse of inspection, as a wide variety of inspections can be performed with these scopes.

DIAMETER CHOICE:			
4.2 mm	5.5 mm	8.0 mm	10.0 mm
