**Endoscopio – Micro Semi-Rigid GenScopes**

The micro semi-rigid GenScope utilizes a unique, slim design that provides superior image resolution in even the smallest voids. This GenScope bows under pressure for both durability and flexibility in tight areas.

It is one of the best compact portable designs on the market today, especially when a lightweight scope is needed. They are useful when inspecting small bores, fuel injection nozzles, fuel lines, or other miniature components with ease

Micro Diameter Semi Rigid GenScope 0.6mm (.025") Diameter						Mirror Sleeve Right Angle Diameter 0.8mm (.032")
