- Comercialización de Productos para Seguridad Industrial
- Comercialización de Equipos y Productos a nivel Industrial

### Tubos Guías – Standard and Extrema Condition

Source guide tubes are flexible stainless steel tubes with a protective polyvinyl covering and are available to fit all SENTINEL™ projector units.

Intermediate and termination source guide tubes, which are interconnectable to provide required length, are available. The intermediate section tube has a male connector at one end and a female connector at the other, and can be used with a disconnectable source stop as a guide tube termination.

The extreme condition source guide tube is designed for use in extreme weather conditions. It has a temperature range of  $-60^{\circ}$  to  $135^{\circ}$  C ( $-76^{\circ}$  to  $275^{\circ}$  F).

Specifications	
Projector	660, 680, 741, 880
Size	7 ft (2.1 m)
